

I pay for XM Radio monthly. This is a listener-supported network and something my family and I really enjoy. This discussion really smells of censorship- XM radio is doing no damage to anyone, it is a service we chose to have and pay for, and frankly- you should have absolutely NO control over it's content! Beyond that, attempting to only allow local stations to carry local information, you are supporting a monopoly (I guess this shouldn't be a news flash to you- considering your de-regulation of the industry has caused the airwaves to be over-run by special interests! How about getting over the power trip and focusing on some real, legitimate issues?!
